DESIGN PROJECT COMPLETED/ RESEARCH

❖ **Juan Dela Cook: A Cookbook Budgeting System**
Sole Web Developer

JDC is a responsive web-based recipe budget recommending system that can be used to check recipes, its ingredients with prices, and estimated budget to make the specific recipe all at the same time. This was developed using HTML5, Bootstrap (CSS3), Javascript (JQuery, Sweetalert2), PHP Native, Flask (Python Framework) and MySQL.
Website link: https://jdc-capstone.com

❖ **Student Performance Tracking System (SPTS)**
Sole Application Developer

SPTS is an application that allows professors and their students, even parents to monitor their performance every grading period. This system was developed using Java and MySQL as its database.
Git repository: https://github.com/JmBishop26/AppDevProject

❖ **Technovation Inventory and Cashier System (TICS)**
Sole Application Developer

TICS is an application that functions as a typical cashier system that also has an inventory system connected to it for a real-time update of prices and stocks available in the shop that sells computer parts and accessories. Technovation system was developed using Java and MySQL as its database.
Git repository: https://github.com/JmBishop26/IASProject

- ❖ **Pet-O-Care**
  Sole Web Developer

  Pet-O-Care is a web-based system that offers hotel booking for pets and an online shop for limited pet products. This was developed using HTML, CSS, Bootstrap, PHP, and MySQL.

- ❖ **Analyzing the Food Consumption Preferences and Patterns Around Metro Manila**
  Data Analyst

  This is a data analyzation project that aims to analyze if there are any existing connections between the food preferences of a person like the type of meal, specific meal, and their basis of food preference whether quality, price, and popularity and the location they are residing. Python, specifically the K-Means algorithm library, was used for this project.
